

# MONOLITH SIGNS

## FUNCTIONAL SLEEK AND MODERN

Monolith style signs have become part of the contemporary signage landscape. Seen everywhere from forecourts to shopping centres, hospitals, art galleries and visitor centres.

By incorporating a modular design philosophy we can create almost any shape or size; fit for any purpose. We can make them with flat faces or curved, with illumination or without. They can be one, two, three or even four sided. Utilising 'off the shelf' aluminium systems or building them to a bespoke design. Fantastic for corporate branding and ideal for incorporating directory panels or wayfinding solutions.

The same style of sign can be designed to work in other areas around the site; ceiling or wall mounted, utilized throughout a building to create a coherent visual impact over a range of sign solutions.

Versatility and dynamic visual aesthetic go hand in hand to create signs that work, last and don't cost the earth.

Contact us for a free consultation or site meeting to discuss your requirements in detail.
